

ЧТО ЕСТЬ ЭКОНОМИКА ВООБЩЕ И ЧТО ОНА ЕСТЬ СЕГОДНЯ

ЮРИЙ МИХАЙЛОВИЧ ОСИПОВ *

Apstrakt: U radu se s aspekta filozofije privrede, na netradicionalan način, objašnjava razlika između privrede kao životne djelatnosti čovjeka i ekonomske kao njenog pojedinačnog slučaja, i to kroz prizmu statike i dinamike i posebno novca kao dominantnog principa. Elaboracijom odnosa ekonomskog i neekonomskog, "ekonomske odozgo" i "ekonomske odozdo" afirmiše se institut ekonomskih sloboda, koji se u praksi narušava dominacijom politike nad ekonomijom. U tim odnosima, odlučujuću ulogu (u pojedinim postsocijalističkim državama kojoj pripada i Rusija) imaju ešaloni vlasti, koji realizuju "ekonomiku odozgo". "Ekonomika odozgo" ne služi "ekonomici odozdo", kako se to pričinjava postsocijalističkim liberalima – tržišnicima, nego "oni dolje" sa žanosom servisiraju vrh, kako to već dobro znaju dirigenti-globalisti. Mora se imati u vidu da ekonomika nije samo privreda, nego i kontrola nad privredom kao specifičan institut koji omogućuje njenu upravljivost.

Ključne riječi: ekonomika, novac, cijena, vlast.

Abstract: In this article from the aspect of the economic's philosophy, on untraditional way, is demonstrated difference between economy as human life's activity and economic as its separate case, and all that from the prism of static and dynamic and especially money as dominant principle. By elaboration relations of economic and non economic, "economic from above" and "economic from below", it is becoming known institute of economic freedoms, which is being disorganized in practice with domination policy over economy. In those relations, decisive role (in some post socialist states where as well Russia belongs) has government echelons, which realize "economic from above". "Economic from above" do not serve to "economic from below", how post social liberals- marketers see that, but "those below" with enthusiasm support "crown", how it is well known to bandmaster –globalist. It must be considered that economic is not economy, but control under economy as specific institute which enable its governability.

Key words: economy, money, price, power.
