

О ЗАКОНАХ ИСТОРИИ ЭКОНОМИЧЕСКОЙ МЫСЛИ

АЛЕКСАНДР ГРЕГОРЬЕВИЧ ХУДОКОРМОВ*

Apstrakt: U radu se s aspekta filozofije ekonomije razmatra pokušaj definisanja određenih zakona za koje autor smatra da egzistiraju u istoriji (evoluciji) ekonomske misli. U tom smislu, možda je najznačajnije pitanje progressa ekonomske teorije, koje se može posmatrati ne samo s aspekta forme (načina ostvarivanja), nego i suštine (kojim društvenim grupama koristi taj progres). S aspekta ekonomske teorije, značajno je da njen progresivan razvoj bitno doprinosi povećanju stepena slobode istraživačkog rada ekonomista, koje se ogleda u brzom razvoju novih alternativnih ekonomskih pravaca kao što je npr. neoinstitucionalizam, koji preferira socijalnu tržišnu privredu jasnih pravila igre.

Ključne riječi: zakoni istorije ekonomske misli, ekonomska teorija, kriza marksizma, neoinstitucionalizam, socijalna tržišna privreda

Abstract: In this article from the aspect of the economic's philosophy, on untraditional way, is demonstrated difference between economy as human life's activity and economic as its separate case, and all that from the prism of static and dynamic and especially money as dominant principle. By elaboration relations of economic and non economic, "economic from above" and "economic from below", it is becoming known institute of economic freedoms, which is being disorganized in practice with domination policy over economy. In those relations, decisive role (in some post socialist states where as well Russia belongs) has government echelons, which realize "economic from above". "Economic from above" do not serve to "economic from below", how post social liberals- marketers see that, but "those below" with enthusiasm support "crown", how it is well known to bandmaster—globalist. It must be considered that economic is not economy, but control under economy as specific institute which enable its governability.

Key words: laws of the history economic thoughts, economic theory, Marxism crisis, unconstitutional, social market economy.
